Product Info Sheet - Flyscreens & Bushfire Screens

Changes to government regulations related to protecting your property and family against bushfires requires installing stainless steel mesh screens to meet bushfire regulations

Steel mesh bushfires screens for rural properties and bushfire-prone areas don't have to be ugly or hard to install.

Dancore metal mesh screens and metal mesh cloth is approved for bush fire prone areas as an acceptable spark barrier stopping flying embers from entering homes (Complies with AS3959-1,2 &3)

Make sure you are protected correctly with screens that still look good while meeting new government regulations!

(PLEASE NOTE: Dancore supply the MESH ONLY, and do not supply the framework.)
